BENEFITS OF SALT THERAPY

Salt Therapy, or Halotherapy is a widely used natural remedy that goes back centuries and has been used to treat upper and lower respiratory conditions such as:

Cold & Flu	Allergies
Bronchitis	Cystic Fibrosis
COPD	Sinus Infection
Sinusitis	Hay Fever
Emphysema	Asthma

The dry sodium chloride in the room is inhaled into the respiratory system. The salt naturally starts absorbing allergens, toxins and foreign substances throughout the respiratory tract. Dry salt helps to reduce inflammation and open airway passages.
